

**rajandran** 8:14 PM

Im expecting 11000 to hit in few days

sort of high volatile bar on daily candle

coz thats where the final option PE writers support is for the month

8:20 PM Clients Buying CEs for this series not a good sign for upside continuation anytime soon or later in this series. Every rise is a short.

**Vineet Kothari** 8:31 PM

Is the session cancelled for today ?

**Phani** 8:31 PM

Yes it is. It shall be covered in tomorrow's intraday nuances session

**Vineet Kothari** 8:33 PM

No I mean Tradezilla 2.0 Final session that was scheduled to cover remaining topics ?  
**Manish** 8:35 PM

Yes, Today's session got postponed to tomorrow Because Mr.rajandran is not feeling well

**Vineet Kothari** 8:36 PM

Ok thank You

### **Nifty Futures - Upside Odds Remains Capped**

Nifty Futures opened gap down on Thursday trading session. Trading activity went on more emotional. During the second half of the session more and more weaker hand sellers participating in the trade.

**rajandran** 9:18 AM

Most of the anomalies got a clear in NF

NFMAY (30 Minute) 2019\_05\_10 (09\_17\_27).png

but still a low confidence markets

If any MR at 9.25 close then possibly could be days top (edited)

then possibly

Watch out for MR Alert in NF if any from OFA

coz first 5min candle is high volatile candle

and inside bar compared to prev day range

so far MR odds

NFMAY (5 Minute) 2019\_05\_10 (09\_20\_29).png

it is one form of exhaustion high as well. (edited)

First 5min high is critical for the day

even if it breaks im seeing a limited upside from here

**Phani** 9:25 AM

Mr confirmed?

**rajandran** 9:25 AM

Its not MR coz Delta conditions are not met

but an exhaustion high

NFMAY (5 Minute) 2019\_05\_10 (09\_25\_42).png

Either way it is a caution sign if one wants to enter late longs

**rajandran** 9:48 AM

Exhaustion high provides good scalping odds especially price travelling faster inside a previous days range.

NFMAY (5 Minute) 2019\_05\_10 (09\_47\_40).png

but it is just a scalping odds

NF low confidence ( no confidence) (edited)

ABC outside day odds in BNF?

if the selling continues

**rajandran** 9:56 AM

yeh

**Phani** 9:56 AM

If it forms, does it have any significance in already established downtrend?

**rajandran** 9:56 AM

but that is sign of more strength on sell side

or even if there is any ABC elongation in NF with single day break

it is a sign of continuation

Good trade location to short is post first 5min of trade

**Phani** 9:58 AM

If Pday low is a multiday low, and if today breaks pday low, would it be a single day low or multi day low

break?

**rajandran** 9:58 AM

most of the multi day breakouts are fake outs where we measure tempo and the way the price is breaking matters for any acceptance

high volatility breakouts are mostly fakeouts

what all points considered for BNF shorts sir

**rajandran** 10:08 AM  
Well defined Single print resistance to monitor  
whereas for NF there is no such immediate resistance levels  
levels are bit far in NF

NF Day low is not secured 540 lots - It is a short term reference with mostly have the odds of taking down intraday.

**rajandran** 10:59 AM  
If not intraday - positionally it is still a weaker low  
as of now confidence remains low  
so wait for some more clues  
could come in the form of ontimeframing  
to trade which direction

FA or not one should check only by eod

**Pratheesh** 11:27 AM

sir in the cuurent scenario beind Dperio low weak, and fail above day high with high volume failed , is it a good place to initiate some shorts with stops above yday ledge

D period low was exactly half back then

Sir seems like we are forming FA's every other day . Can we decipher anything from this kind of auction...

**rajandran** 1:35 PM

FA or not just confirm only by the EOD

still day is not done yet

1

If it is going to be FA in case by EOD

then again back to back FA likely to be strong resistance zone

in near future

**Pratheesh** 1:36 PM

**rajandran** 2:14 PM

upside spike is possible in NF

towards FA

2

And that brings G2 Low

possibly

Mostly fridays are fast trade days

1

be a laggard you are done

Still the odds on the upside is limited than the downside left in NF and BNF

Balanced Structure so far and stops are there eitherside and price trading at the days center.

Is the trend bottom done in Nifty. Not yet.

What will happen in the last 45min : I have no idea

**ritesh** 2:46 PM

11420-440 first would be good.

**rajandran** 2:54 PM

NFMAY (5 Minute) 2019\_05\_10 (14\_54\_25).png

always such price levels prone to revisit doesn't matter how higher nf goes from here.

FYI - There is not FA on the day high

day low look like FA but still we have another 30 more min

so that's the reason I am saying FAs need to be watching on EOD basis

2

Stealth Auction, FA, Poor Low/Poor High, R-PPOC, AB Poor Low such kind of stuff needs to be watched on EOD basis

most of the time it has odds of clearing during the day

and could lead to unwanted bias.....I been there many times (edited)

VPOC cleared
